

Auric Solutions Ltd specialises in providing National Instruments LabVIEW™ software solutions for automated test and measurement applications, industrial control, monitoring, and remote data logging. Either through the automation of existing test and measurement equipment, or by utilising high-performance data acquisition technology from National Instruments, we can increase the effectiveness of your test solution, resulting in improved product throughput and quality. As a National Instruments Certified Alliance Partner, we aim to provide the highest quality of software, system integration, and consulting services designed to meet or exceed your requirements, including:

- LabVIEW drivers for instrument remote control using all types of interfaces
- LabVIEW add-on toolkits and application development tools
- Consulting for existing software modification and improvement
- Custom signal interfacing hardware (e.g. TTL relay board)
- Stand-alone applications and graphical user interfaces
- Data acquisition, analysis, presentation, and logging
- Automated test solutions using PXI or PC platforms
- Manufacturing test and design verification solutions
- Video and audio generation and measurement
- Image acquisition and analysis
- Training and documentation

POWERED BY

NATIONAL INSTRUMENTS LabVIEW™

Serial No: IQ12_A56121340 Sales Order No: SAMPLE
 Part No: IQ12_400005 Sales Order Line: 212
 Second Board Serial No: N/A Planned Order No: SAMPLEXX
 Comment: Blank Download
 Address to Use: N/A Test Voltage: 24 VAC

TEST SEQUENCE

File Name: IQ12_24.seq Steps: 56
 Description: Sequence to Test IQ12 standard 24v product

TEST FIXTURE

ID: 57022 Description: IQ12x Cass. FC Control...

Calibration: OK SMU: M144010668.249-249-207-100
 Alarms: 0 Analogue: 0 Digital User: Mike (Engineer)
 Warnings: 0 Analogue: 0 Digital Time: 05/05/2011 13:15:30
